Add Tasks if necessary

- **Tasks are necessary if you need to assign work (tasks) to other teams in regards to the change.**
- **Describe the work you need completed and assign to the correct team.**
- **A Validation Task is generated by default and assigned to the Originator/Requestor.**

The screenshot shows the Alaska Airlines task management interface. At the top, there are tabs for 'Journals', 'Tasks (Open: 1 | Closed: 0)', 'Change API Stagings', 'Calendar Conflicts: 0', 'Change Caused These Incidents', 'Related Change', and 'Change Is F'. Below the tabs, there is a 'New Task' button and a 'Record 1 of 1' indicator. The main section displays the task details for task ID 92748. The status is 'New', and it is owned by 'Clear Fields Below'. The task is a 'Work Item' type, with a start date of 9/27/2017 9:00 AM and an end date of 9/27/2017 12:00 PM, resulting in a duration of 180 Mins. The description field is empty. On the right side, there are links for 'Link to upstream Task' and 'Add downstream Task'. The 'Backout Plan' and 'Communication Instructions' fields are also empty.

Normal

Wait for Implementing Status before you work the Change Request

- Peer approver needs to review/approve the CR
- Any/All Tasks must be Acknowledged by the assigned team member
- The CR will then move into IMPLEMENTING Status.
- You now have the approval to work the Change Request as scheduled.

The screenshot displays the 'Change 25090' interface. At the top, a navigation bar includes tabs for 'New', 'Comm. Plan', 'Task Plan', 'Peer Review', 'Implement', and 'Closed'. The 'Implement' tab is active. Below the tabs, the 'Status' is 'Implementing', with links for 'Back to Peer Review' and 'Informational View'. The 'Type' is 'Normal' and the 'Risk' is 'Low'. To the right, the 'Implementation Status' legend shows three categories: 'Acknowledged' (1 in a grey circle), 'Completed' (1 in a green circle), and 'Declined' (0 in a red circle with a small upward arrow).

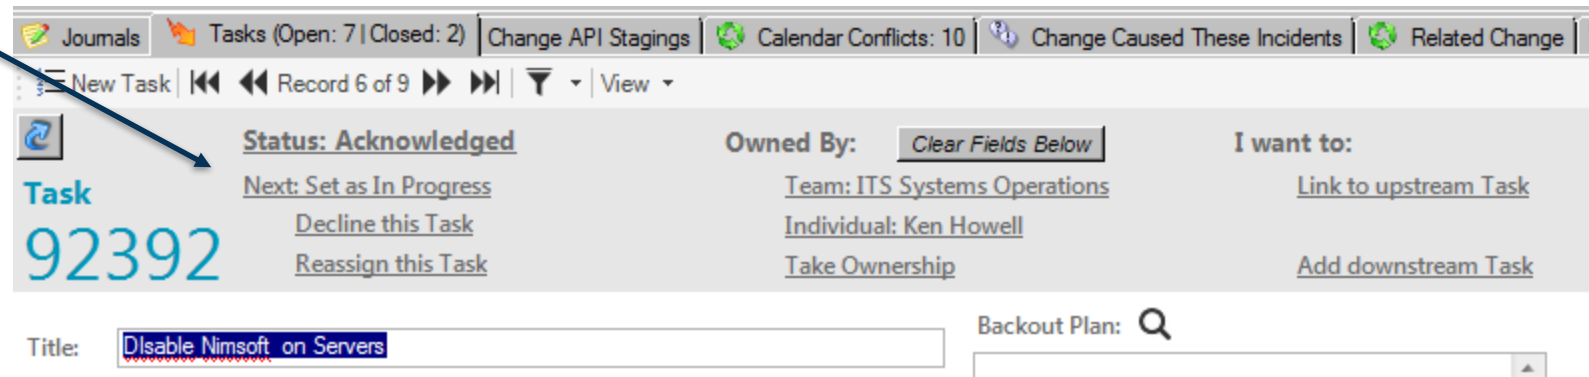

Implementation Status
1 Acknowledged
1 Completed
0 Declined

Normal

Complete the assigned work

- Close any Task assigned to you by stepping them from:

Acknowledged > Set as In Progress > Closed

The screenshot shows a task management interface. At the top, there are tabs for 'Journals', 'Tasks (Open: 7 | Closed: 2)', 'Change API Stagings', 'Calendar Conflicts: 10', 'Change Caused These Incidents', and 'Related Change'. Below the tabs, there is a navigation bar with 'New Task', 'Record 6 of 9', and a 'View' dropdown. The main content area displays a task card for 'Task 92392'. The task is currently in 'Status: Acknowledged'. Below the status, there are links for 'Next: Set as In Progress', 'Decline this Task', and 'Reassign this Task'. To the right of the status, there is a section for 'Owned By:' with a 'Clear Fields Below' button. Below this, it shows 'Team: ITS Systems Operations', 'Individual: Ken Howell', and a 'Take Ownership' link. Further right, under 'I want to:', there are links for 'Link to upstream Task' and 'Add downstream Task'. At the bottom, there is a 'Title:' field with the text 'Disable Nimsoft on Servers' and a 'Backout Plan:' field with a search icon.

- The Change Request will close automatically once all the Tasks are closed. Be mindful of Soft or Hard freezes and get the appropriate approvals as necessary.

HARD CHANGE **FREEZE**

More rigid than a soft.

Pre-approved by a director,
two MDs, and the CAB

Limits disruptions that may be
caused by new changes

Standard are not allowed to
bypass the approval process

APPROVALS

The Change Advisory Board (CAB) performs an
important role to validate change plans and
approve changes to be made with production
applications and systems.

SOFT CHANGE **FREEZE**

Changes to systems or
processes can still happen,
but they require extra
approval

Director approval required

Every Friday, Sat, and Sun is a
soft change freeze
