

Normal Changes

Based on the Risk level evaluated by the Risk Analysis Questionnaire, requirements for changes are as follows:

- Low Risk changes require a **Peer Review**.
- Medium & High Risk changes require a **Peer & CAB Review**.

During the **soft change freeze** normal Change Requests (CRs) can be processed with Director Approval plus whatever authorizations are required based upon the assessed risk level.

During a **hard change freeze** all changes must be further authorized by the Managing Director (MD) requesting the hard freeze and the VP of Infrastructure Operations.

Remember that if your CR is identified as low risk scheduled outside a change freeze and you would like to raise visibility, you can select "Volunteer Visible to CAB" from the left-hand side of your CR form.

Optional Actions:
