

# Change Request Summary for CR#125660

---

## Deployment Overview for IT Teams and Change Managers

### 1. Deployment Details

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Service / Component | Web Preference Center                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Change Summary      | <ol style="list-style-type: none"><li>1. Fix the Tealium events when opening/closing the MFA accordion in the Profile and Settings page. The open event was triggering when the accordion was closed, and the close event was triggering when the accordion was opened.</li><li>2. Make the open/close Tealium events trigger less often. They were being triggered whenever the guest clicked inside of the accordion, not just on open/close.</li><li>3. Add an audit type for MFA changes. This is foundational work to update the audit trail. There are currently no MFA audit types in the prod database, so these changes are not used.</li></ol> |
| Version             | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Change Request Link | <a href="#">Link to Cherwell CR#125660</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

### 2. Impacted Systems

|                                  |                                                |
|----------------------------------|------------------------------------------------|
| Primary Systems                  | Web Preference Center                          |
| Downstream/Upstream Dependencies | None                                           |
| Guest Flows / Touchpoints        | MFA accordion in the Profile and Settings page |
| Risk Level                       | Low                                            |

### 3. Rollback Strategy

*Outline the steps for reverting the deployment if needed, including responsible parties and estimated rollback time.*

|                         |                                                                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Rollback Method         | Run the rollback stage in the Web Preference Center pipeline                                                                                                                                                                                                                                 |
| Rollback Owner          | John Louie                                                                                                                                                                                                                                                                                   |
| Rollback Trigger        | <ol style="list-style-type: none"> <li>1. Tealium events not triggering at all when the MFA accordion is opened/closed</li> <li>2. The MFA accordion doesn't open or close</li> <li>3. The audit trail table or notes and audits trail stops working.</li> </ol>                             |
| Estimated Rollback Time | 10 mins                                                                                                                                                                                                                                                                                      |
| Rollback Steps          | <p>Approve the rollback stage of this Web Preference Center pipeline run:</p> <p><a href="https://dev.azure.com/itsals/E_Retain_Account/build/results?buildId=3506973&amp;view=results">https://dev.azure.com/itsals/E_Retain_Account/build/results?buildId=3506973&amp;view=results</a></p> |

#### 4. Alerting and Monitoring

|                  |                                                                                                                                 |
|------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Dashboards       | <a href="#">Tealium Dashboard</a>                                                                                               |
| Alerts           |                                                                                                                                 |
| On-Call Channel  | <a href="#">On-Call Alerts</a>   <a href="#">Account Dracula</a>   <a href="#">Microsoft Teams</a>                              |
| Success Criteria | The Tealium events when opening/closing the MFA accordion are no longer backwards. The events only fire once on open and close. |

|         |                                                                                                                                                                                                                                                                                     |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RBX     |                                                                                                                                                                                                                                                                                     |
| MBX     |                                                                                                                                                                                                                                                                                     |
| Runbook | Wiki page for the MFA feature in Profile and Settings:<br><a href="https://itsals.visualstudio.com/E_Retain_Account/_wiki/wikis/Account-Experience.wiki/44149/MFA-opt-in">https://itsals.visualstudio.com/E_Retain_Account/_wiki/wikis/Account-Experience.wiki/44149/MFA-opt-in</a> |

#### 6. Proof of Testing

[Screen Recording 2026-03-25 at 4.00.00 PM.mov](#)

This video shows a guest interacting with the MFA accordion on the left side, and the Tealium dashboard on the right side. The Tealium dashboard shows that only one event is triggered each time the accordion is opened or closed. Clicking links inside of the accordion also does not generate additional open/close events.

## Audit trail

| Date                    | Added by | Activity type      | Details or changes                             |
|-------------------------|----------|--------------------|------------------------------------------------|
| 08/19/2025, 10:54:03 AM | System   | Personal Info Edit | Atmos Rewards Number changed from to 931747751 |
| 08/19/2025, 10:54:00 AM | System   | Profile Created    | Profile created                                |

The screenshot above shows the notes and audit trail in QA. The MFA audit type has been added, and it doesn't break anything.
